# Ways to Wellbeing

**We all have mental health, just as we all have physical health. Good mental health is about feeling positive about ourselves and our lives. It's also about being able to cope with problems when they happen.**

One in four people will experience mental health difficulties, such as depression or anxiety, at some time in their lives. 50% of mental health disorders emerge before the age of 14 and 75% before the age of 25.

However, research tells us we can protect our own and our children's emotional health by including these 5 Ways to Wellbeing as part of our everyday lives.
