Enquiries

- What can I see out of my window?
- What would be a perfect creature to live in my garden?
- How do you attract more?
- What colour is Autumn?
- Which sense is the most important?

Key Facts

A scientist studies the world around them and finds out things by observing, describing and experimenting. There are 4 seasons and these are Spring, Summer, Autumn and Winter. Animals have skeletons. There are five senses. They are touch, taste, smell, hear and see. A geographer is an expert in the study of the earth, its land and its features and its animal and human inhabitants. The United Kingdom is made up of England, Wales, Scotland and Northern Ireland. The UK is surrounded by water.
